

PYTHON Workspace

This folder is for general Python learning, experimentation, and notebook-based workflows.

Purpose

- Practice Python coding and data analysis
- Document Python language features and libraries

Usage

- Open `python.ipynb` for interactive Python examples
- Store scripts and notes in this workspace
- Run `uv sync` & `uv run jupyter lab` to start the environment

Conventions

- Organize notebooks and scripts by topic or library
- Use markdown for explanations and code cells for code

Startup Code

```
cd /home/me/Notebooks/PYTHON
uv sync
#uv run jupyter lab
uv run python main.py
```
