

HelpMan

Linux command help and manual pages in html for the browser

The current Open WebUI host mapping treats me@p48 as the 0101-side companion and uses llama3.2:1b as the shared small Ollama model.

Launch the matching companion from the sibling workspace:

```
cd /home/me/Notebooks/OPENWEBUI
uv sync
./openwebui-host.sh me@p48
```

Startup Code

```
cd /home/me/Notebooks/0101/0101
uv sync
#uv run jupyter lab
uv run python /home/me/Notebooks/0101/0101/src/public_html/server.py
```
